This is to state that the existing High School Building Consisting of RCC Framed Structure. The said structure has been originally designed for light weight partition walls. Hence removing brick masonry wall and replacing with light weight partition walls as per drawing doesn't affect the stability of structure of its own.

The existing building of structure is situated at Orchids The international School Building at No.76/2, opposite R.V Engineering College, Bangalore. Hence is well maintained in Good condition without any sign of structural distress and is safe
